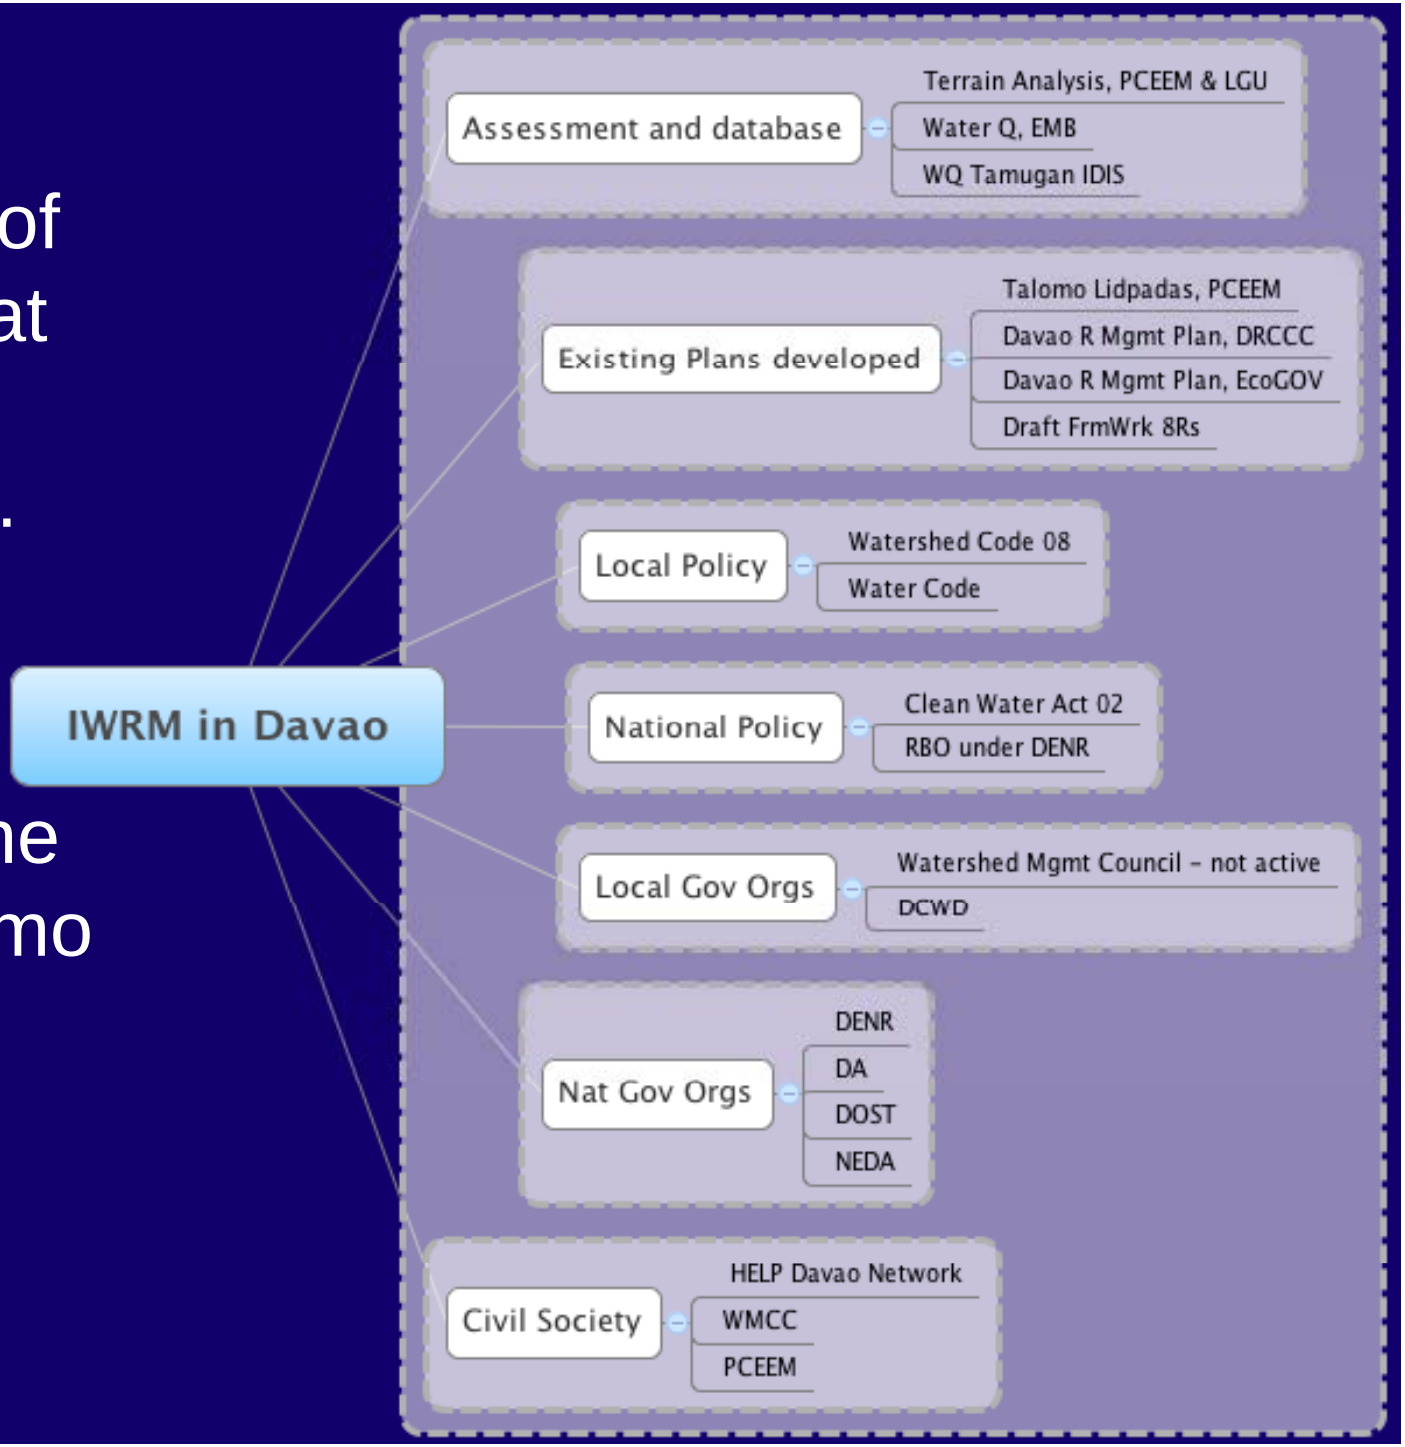
A City of (8) Watersheds

City Area: 236,124 (ha)
Watershed Area: 293,172 (ha)

Source: City Planning/ ERDS DENR XI

Wide range of initiatives that have piloted IWRM, but…

Largely focused in the Davao, Talomo and Lipadas watersheds.



Hydrology for the Environment, Life & Policy

http://www.unesco.org/water/ihp/help

To deliver social, economic and environmental benefit to stakeholders through sustainable and appropriate use of water by directing hydrological science towards improved integrated catchment management basins

Real people	Real catchments	Real answers

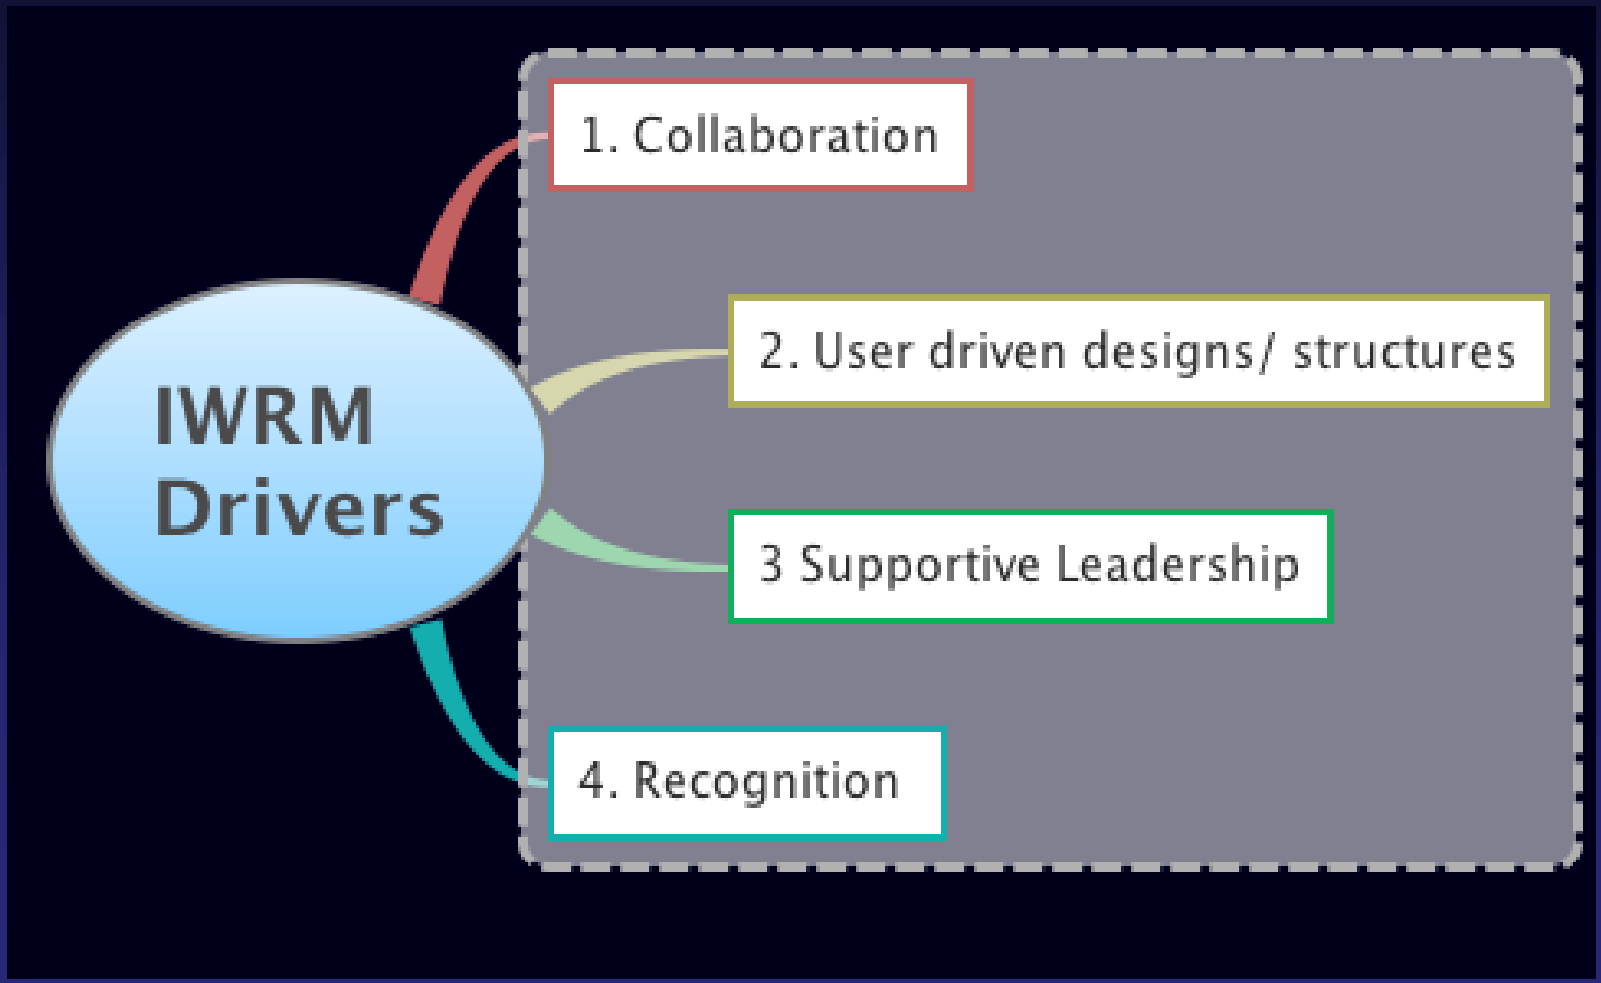
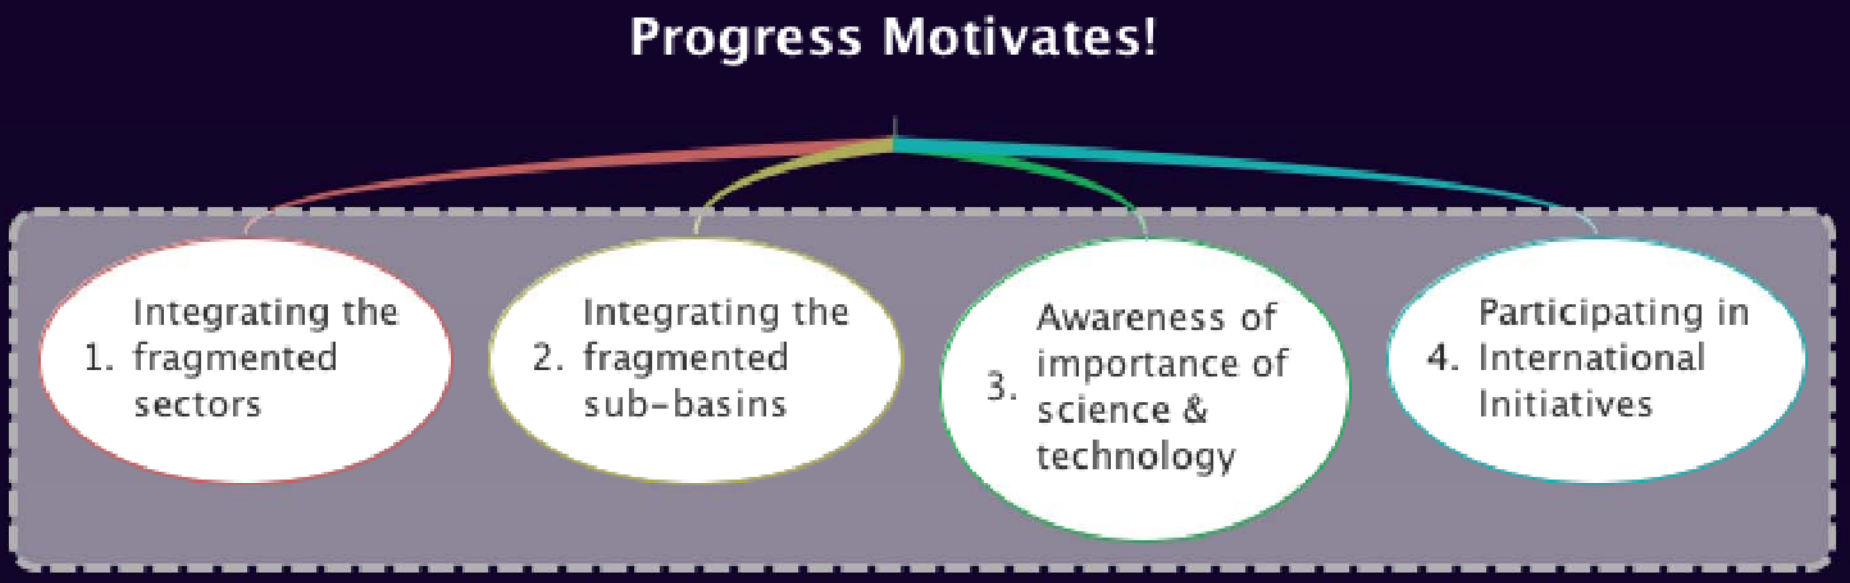
Drivers for participation

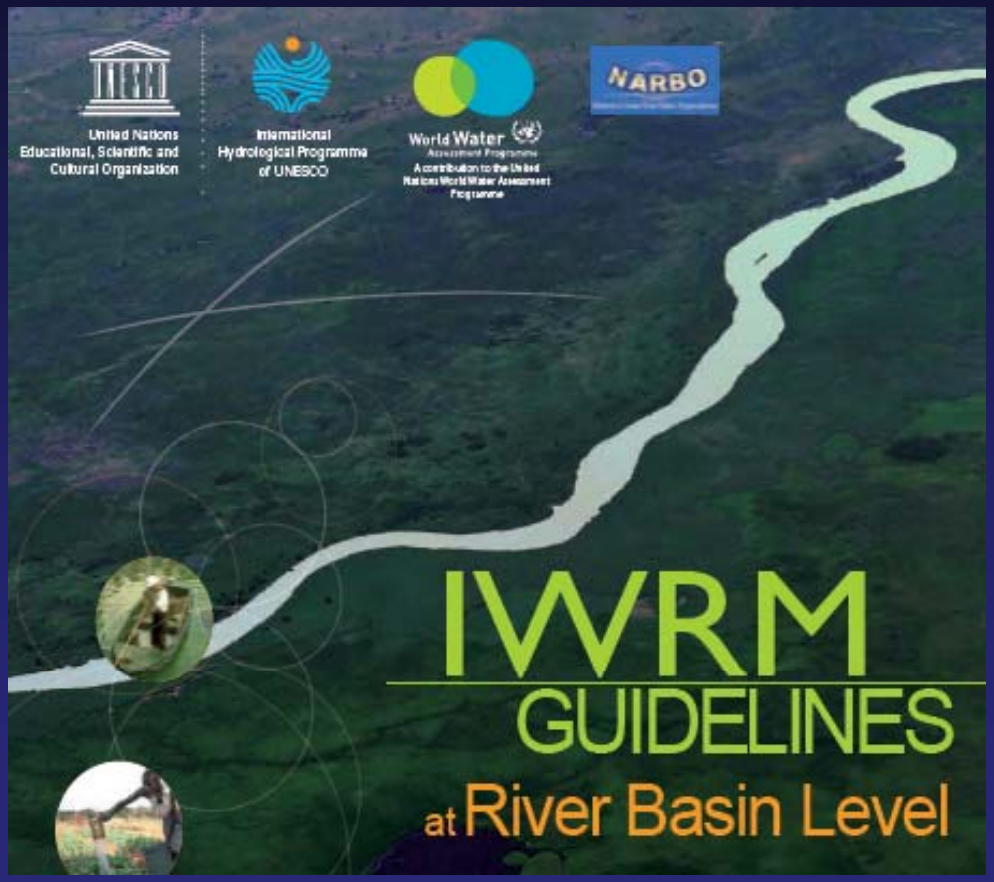


4 Key's to Success



Identifying current priorities

Accepted international principles adapted with the details of specific settings



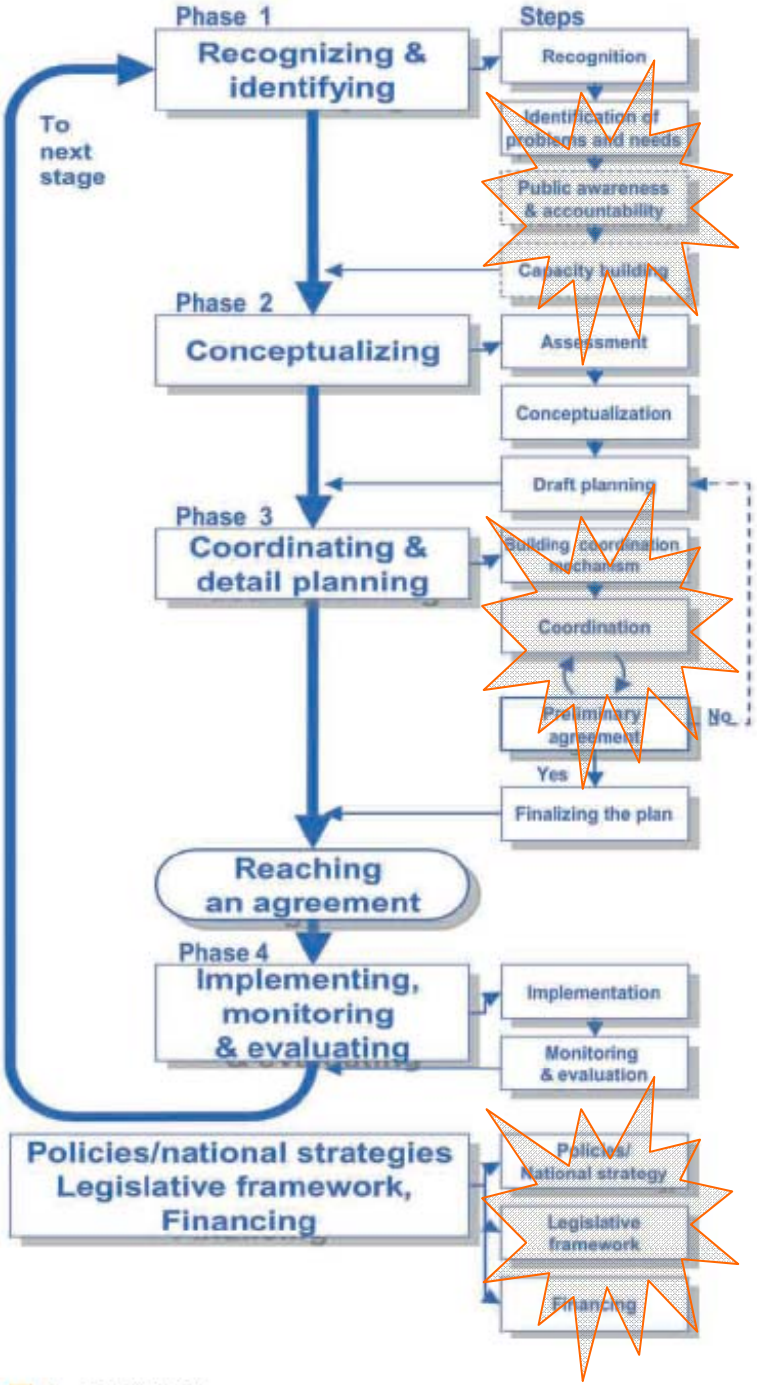


Fig. 3.1 IWRM Process

Priority Actions

1. Establish a new 3 year Davao Water Partnership.
2. Develop a locally adapted training guideline for IWRM theory, tools & practice
3. Development of river basin health scorecards.
4. A review of current decision-making systems and structures
