

Flood session

Objective of this session

1. We are living with Flood.
 - A lot of major cities in Asia are developed on the flood plane
 - degradation of watershed due to expansion of development
 - Large fluctuation of river flow, etc.
2. We need further investment against “water”.
3. We have been carrying out comprehensive approach
 - Infrastructure and soft,
 - Basin plan based on prediction and prevention.

When we talk about IWRM for Asia, we have to face “flood”.

In this session, advanced information, reports from members and result of analysis will be introduced for “our future action”.
