# Questionnaires

In your country and/or basin, please describe the status on below questions:

- What are the content of National basic laws and regulations describing water financing system?
- Who is in charge for providing raw water service for people (urban & rural areas), agriculture, industry, and energy and environmental/nature and how you classify the major raw water service providers?
- What are the sources of financial resources (investment and O&M): Government Budget (Central/Local) and/or Beneficiaries, including the cost allocation/sharing system and the mechanism of its accountability.
- What are the difficult issues, constraints and problems in financing the needs for water resources management in your country/basin and what are your organization efforts to improve water financing condition?
