

The First Training Program on IWRM And Strengthening of River Basin Committees (RBC)

Prepared by Nguyen Chi Yen, MoNRE, Vietnam

IWRM

IWRM is actually a process has been recognized as one of the best approaches towards sustainable and effective water resources management, and in order to prepare a plan, the key elements of IWRM must be integrated into the overall water resource management from the central government down to the grassroots level.

IWRM can motivate decentralizing the decision-making and responsibility to the stakeholders in the river basins, an evolving process of involving the stakeholders in the design of RBC organizational structure as well as functions has taken place.

Lessons learned from the course

Lessons learned from the course is I can apply IWRM method with sector-wide approach method to develop master plan of water resources protection, sustainable development base on the expertise and community approach.

Promoting the participation of civil society in identifying needs and issues, designing solutions, and establishing mechanisms for monitoring and dispute resolution and developing tools, including guidelines for the design and implementation of successful participatory processes in water sector activities is the advantage and result of effective IWRM in country and region.

Developing and disseminating action plan and an outline or roadmap to put IWRM into practice for State water resource management plan for nation-wide.

Introducing IWRM concept to our colleagues, water resources manager direct related to water resources management.

Conclusion

The course can help me more confident to make individual strategies or action plans for organizational level

Enable me to translate the IWRM concepts into the planning process as well as disseminate IWRM concepts to target groups.

The Regional Training Program on IWRM and Strengthening of River Basin Committees has gained its aims to strengthen the capacity of IWRM to participant on putting concepts into IWRM practice.
