

Questionnaire I (Country Report I)

Please describe your expectation for this thematic workshop on water resources and water right.

(Country Name: Indonesia)

We have enacted law for water resources since 2004. The draft for several regulations for implementing the law are being made. We want to know the structure of law and regulation in other countries. We also want to familiarize with practical/pragmatic guidance on water allocation to many water uses.

We also need to know the regulation on granting water right; the procedure to apply, who should apply, how and by whom the right is issued.. There should be limitation, condition, criteria, to meet the demand with the restriction of water availability.
