

Review of former sessions and Session abstract (IV, V)

Michitaro Nakai, NARBO
Associate, ADB Institute

In this presentation...

- Review of the session 2 & 3
- Our ideas on important point
- Abstract for today's sessions (IV, V)

Review 1 (typical issues 1)

- Organizational issues
Lack of coordination among water-related agencies,
RBO related issues
- Legal issues
Water rights issue, Lack of basic water law
- Other Administrative issues
Lack of Basin planning

Review (typical issues 2)

- Technical issues
Data management, Improvement of staff capacity
- Financial issues

Review (example of proposal 1)

- Concerning the lack of coordination among agencies
 - (1) Clarification of the mandate of the water-related organizations, and promotion of RBO establishment (Vie)
 - (2) Review of mandates, roles and responsibilities, plans and programs (Phi)
 - (3) Establishment of Apex Body (national level), and coordination body at the basin level (Ind)
 - (4) Capacity building and strengthening institutional framework; developing human resources; raising awareness and perusing participatory approach (Lao)

Review (example of proposal 2)

- Concerning the water rights issues
 - (1) Preparation for guidelines for water rights (Vie)
 - (2) Education and information campaign (Phi)
 - (3) Strict implementation of law (Phi)
 - (4) Establishment of RBO (Phi)
 - (5) Formulate and implement Raw Water Pricing Policy (Phi)

Review (example of proposal 3)

- Concerning the issues on basin planning
 - (1) Establishment of mechanisms to synchronize plans, programs and activities of agencies and organizations (Phi)
 - (2) Development of water resources master plan for Sri Lanka for next 25 years (Sri)
 - (3) Should assess the process to prepare the river basin planning (Lao)

Review (example of proposal 4)

- Data management
 - (1) Collection of water uses data at the community level for sharing between public and people sector (Thi)
 - (2) Improved investment in advanced technology, equipment, technical science in order to facilitate to calculate, design and implement water resources management process (Vie)

Important point (1)

- In order to realize your proposal, what will be your organization able to do? Please consider this point.
- Final action plan should include this matter, **“What my organization will do for realizing the proposal”**

A hand holding a pencil, positioned at the top left of the slide, pointing towards the title.

Important point (2)

- Your proposals are feasible?
- We don't require to achieve big goals. The action plan should be feasible, taking the status of your organization into consideration.

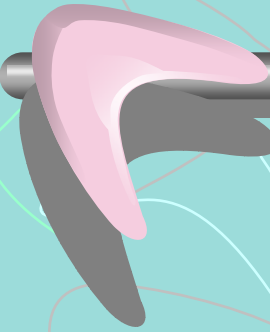

Session IV: Internal Discussion & revision of the discussion material

- Free discussion & consideration
- Discuss how to revise your original discussion materials
- Discuss with co-participant of your country (using your mother tongue), or consider by yourselves
- No presentation in this session
- You will give a presentation on how to revise the materials in the next session (Session V)

Session IV: Internal Discussion & revision of the discussion material

- Please discuss intensively (1) the contribution of your organization to the proposal, and (2) feasibility of the proposal.
- You may reduce/cut the proposals which you think are not so feasible.

Session V: Presentation on the revision of the discussion material

- Presentation on the outcome of the former session
- Presentation time: 20 minutes per one country
- Oral presentation will do (without Power Point File).
