**RRBO, Institute of Water Resources Planning - MARD  
162A - Tran Quang Khai Str. Hanoi - Vietnam**

# **Session 1. Report on the situation of the dissemination and discussion in Viet Nam**

**1. The situation about the dissemination of the information on the session outcome of the 3<sup>rd</sup> thematic workshop**

**2. The situation of the internal discussion before preparing the discussion materials of the 4<sup>th</sup> thematic workshop**

## Session 1. Report on the situation of the dissemination and discussion in Viet Nam

1. The situation about the dissemination of the information on the session outcome of the 3<sup>rd</sup> thematic workshop
2. The situation of the internal discussion before preparing the discussion materials of the 4<sup>th</sup> thematic workshop

## **Session 1. Report on the situation of the dissemination and discussion in Viet Nam**

### **1. The situation about the dissemination of the information on the session outcome of the 3rd thematic workshop**

At the general meetings 2006 of the RRBO and Day and Cau sub-RBOs, discussions were made on necessary scientific and technical documents that need to be prepared approved as basis for RBOs to carry out IWRM:-

1. Integrated river basin water resources development planning;
2. Integrated river basin water resources management planning;
3. Calculations tools for water demands, water balance, environment and water quality which are standardized for RBOs to apply in their management;
4. Operation procedures for reservoirs in flood seasons and dry seasons as basis to resolve conflicts between power generation and other economic purposes.

**1. The situation about the dissemination of the information on the session outcome of the 3rd thematic workshop (cont)**

5. Capacity building for RBO and sub-RBOs to well perform their functions and responsibilities, in view of organization, monitoring tools and consultancy for conflict resolution in water allocation and water rights.
6. Financial support for activities of RBOs.

## **2. The situation of the internal discussion before preparing the discussion materials of the 4th thematic workshop**

- 2.1. Technical planning documents should be prepared and approved.
- 2.2. Operation procedures should be developed and implemented.
- 2.3. Organization strengthening and capacity building for RBOs.
- 2.4. Study tours to learn experiences on IWRM.
- 2.5. Appropriate regulations should be prepared in proposing water tariffs.
- 2.6. Community consultations on development Planning and management planning at provinces in the basin to reach consensus in implementation ./.
