# The JUAN Group

# Women Participation / Gender Issues

## ✓ Targeted information Data:

1. Are the women are working in different (Professional, Technical, Support) levels?
2. What type of works/ activities covers by the women?
3. By what percentage the women are involved in the works/Activities?
4. What are the problems/Challenges the women faces?
5. What are the women's thought/views?
6. What type of coordination relations are existing between the women's groups?
7. What are the women's suggestions/recommendations for any improvement?

# Group Findings

1. The Women are working in different levels including the decision making committees.
2. The women are working as Managers, Officers, Engineers, Cook, Cleaners and.....etc.

## Group Findings (Cont...)

3. As a result of the interviews done by the group members with some men / women during the visit, the percentage of the women in LLDA is 75%, in Province of Laguna (Mitigation, Disaster preparedness & Response) 50% and in (TERESA) is 30% (28 Man and 12 Women).

# Group Findings (Cont...)

4. AS searched, the followings are some challenges that the women are facing:

- Poverty
- Limitation in type of the works that need to be undertaken.
- Housekeeping.
- Feeding of the babies.
- Biological limitation of the women's nature.
- Etc.

# Group Findings

- 5, 6 and 7. The team members tried to interview to the available women, but since they were busy for covering of their responsibilities, the information couldn't be fetched. They seemed happy for having job, especially whom were working for the activities in the offices.

# Summary/Conclusion

The Gender issues and the women participation in IWRM activities are considered realistically. It caused as one of the keys factor to success the IWRM activities

**MARAMING SALAMAT PO!**

**Thank You Very Much**

**Terima Kasih**

**Any Question?**
