Country Name: Indonesia

Name of Organization: Jasa Tirta II Public Corporation

1	1st Selected Issue:	No water guarantee on sustainable water availability.				
2	Proposal:	Regulation on Implementation of Water Law should be prepared soon regarding management concept on IWRM.				
	How to realize the above proposal?	<ul style="list-style-type: none"> a. Identifying related aspects based on Jasa Tirta II activities on IWRM, that depend on mentioned regulations. b. Information and Report preparations. c. Contributing in such related meeting and discussion on that. d. Implementation of the regulations. e. Monitoring and evaluations. 				
3	Evaluation (1) from the view point of effectiveness	The regulation could become guidance on water guarantee concept, and correspondingly will be realized by the government through the RBO (as operators). The effectiveness could be examined based on the increment of realized regulations.				
	Evaluation (2) from the view point of feasibility	It is very feasible and compulsory. Without any regulation of implementation, the Water Law will be meaningless.				
	Evaluation (3) from the view point of sustainability	It will be sustainable if the regulations are formulated properly and accommodate entire aspects of stakeholders.

Discussion Material (2)

Country Name: Indonesia

Name of Organization: Jasa Tirta II Public Corporation

1	1st Selected Issue:	No water guarantee on sustainable water availability.				
2	Proposal:	Intensive campaign on public awareness to concern on watershed conservation and management.				
	How to realize the above proposal?	<ul style="list-style-type: none"> a. Identification of water degradation area as campaign point. b. Campaign method and presentation preparation. c. Action d. Monitoring and evaluation 				
3	Evaluation (1) from the view point of effectiveness	The effectiveness could be measured by monitoring the responses from the public, especially in water conservation action. Indirectly, watershed degradation will be decreased at least in local or partial area.				
	Evaluation (2) from the view point of feasibility	Campaign activity is feasible to be realized, however, it should be noticed that the public understanding will depend on the presentation material and social condition.				
	Evaluation (3) from the view point of sustainability	It will be sustainable, no significant financial required, only campaign points should be selected properly.				
4	Implementation Agenda	Item in processes	2007	2008	2009	2010
		a. Identification of water degradation area as campaign point.	✓			
		b. Campaign method and presentation preparation.	✓			
		c. Action		✓		
		d. Monitoring and evaluation		✓	✓	✓
5	Difficulty in Implementation of your proposal	How to prepare the proper presentation and acceptable for the audiences / public.

Discussion Material (2)

Country Name: Indonesia

Name of Organization: Jasa Tirta II Public Corporation

1	1st Selected Issue:	No water guarantee on sustainable water availability.				
2	Proposal:	Reviewing of applied IWRM technology on Citarum River Basin, including its upgrading and developments to ensure sustainable water availability.				
	How to realize the above proposal?	<ul style="list-style-type: none"> a. Identification of water quantity degradation area and the related technical aspects. b. Technical review on related aspects. c. Recommendation and action. d. Monitoring and evaluation. 				
3	Evaluation (1) from the view point of effectiveness	The effectiveness could be measured by monitoring the water quantity condition, especially during dry season. The correct selection on artificial method and technology based on actual and natural condition will influence the effectiveness.				
	Evaluation (2) from the view point of feasibility	The proposal is really feasible according to the availability of information of the technology so far. Event the number of qualified human resources is still limited; it could be managed quite well.				
	Evaluation (3) from the view point of sustainability	The sustainability of this proposal only depends on the financial support, especially during implementation of the technologies. At least it could be implemented gradually.				
4	Implementation Agenda	Item in processes	2007	2008	2009	2010
		<ul style="list-style-type: none"> a. Identification of water quantity degradation area and the related technical aspects. b. Technical review on related aspects. c. Recommendation and action. d. Monitoring and evaluation 	✓			
5	Difficulty in Implementation of your proposal	How to select the acceptable and applicable technologies in order to prevent water quantity degradation. Also the implementation of the technologies.				
6	Other Related Organizations	Central, State and Local Government.
