

Group Work 3

Institutional approaches to the problems reported after the field visit

The participants were divided into three groups. The membership of each group was the same as in Group Work 2

The groups were asked to discuss, and prepare reports, on the following assignment :

Keeping in view the problems and prospects identified during the field visit in all parts of the Maha Oya basin, suggest long-term and short-term changes and actions in relation to:

Group A : Environment and water quality

Group B : Organizations and co-ordination

Group C : People's participation in decisions and actions

Please try to make use of the conceptual frameworks that were given in the presentations on the first 2 days.
