Studied Area

Water distribution pipeline supplied 98 villages in 1980, today only 54 – rest of villages use unsustainable alternatives to supply water

	Questions	Answer in (%)	
1	Have water committee?	100%	
2	What is the women percentage in water committee member?	7%	
3	Interest on the responsibilities of water committee	75%	Don't know what CM do
4	Water Shortage	74%	Not enough water in dry season
5	How much does it cost to maintain the current system and who pays for it?	92%	Community is willing to pay to maintain current system.
6	Do you know about water cycle and how are quantity, quality and eco-system interlinked?	90%	No knowledge
7	Do you know what is the national water policy?	97%	No
8	Do you know what are the rules and regulations of rural water distribution system?	94%	No
9	What is the major source of household drinking water?	70%	Surface water distribution system
10	Do you know how to treat water for minerals?	69%	Don't know
11	What is the cost of a unit water?	55%	Don't know

Goal – Sustainable surface water distribution system

Objective- Awareness raising training programme and Inclusive governance

Output 1- Awareness of the connecting between water quantity, quality & Ecosystem and gender equality , Proper O&M plan in each village

Output 2 – Enforcement of suitable rules and regulation of rural water distribution and treatment system

Activity 4 .1– Training of community in result of evaluation of O&M committee how to make O&M plans and reports, how to do to be financial sustainability.

Activity 4.2 - Doing consultation about information/advice about suitable rules and regulation and Technical training to the communities

Activity 3 - Analyzing and Evaluation to my survey data and literature reviewing

Activity 2- Interviewing with rural communities, related agencies by using field survey questions. (Base line data of the project)

Activity 1- Doing Field surveying questions regarding (1) the water quantity and quality and about water policy (2) O&M plan and perception of water policy (3) about gender equality (4) about rules and regulations (communities and related agencies such as DRD,DWIR,MOALI so on...

Goals of the Sustainable surface water distribution system

- * **Capacity building**
- * **Community building**
