Ageing Water Storage Infrastructure: An Emerging Global Risk

by admin in UNU-INWEH Reports

Information sharing is a key to the solution

Information sharing among practitioners of NARBO provides an immediate solution.

Information sharing develops into a long term fundamental solution like an ODA project.

For finding the potential for a project, JWA can conduct field surveys and have discussions with relative governmental organizations and private companies in Japan.

Information sharing in Asian countries can contribute to global agenda.

NARBO Webinar contributes to Information sharing in Asian countries.

The potential speaker of NARBO Webinar

All member of NARBO, 94 organization of 19 countries, are to be the potential speaker

Climate Change

Sustainability of O&M

**Other
(Proposal)**

We are planning to hold Next NARBO Webinar on February -
March, 2022. (Before 4th APWS)

We welcome all positive proposal to organize the 2nd NARBO Webinar.

NARBO is a link for Global Consensus

Thank You for your attention
